**Document Location:**

**Work initiated by:**

**Work funded by:**

**Type of review:**

**Location of Work:**

**Abstract or brief summary:**

This article discusses the lack of ecological information on benthic invertebrates in streams of the Sonoran Desert. Subsequently a study was conducted along Aravipa Creek in Graham and Pinal counties, Arizona. Data was collected along the life zones that the stream crosses providing a picture of the changing benthic organisms within each of these life zones.

**Topic category:** Invertebrates

**Keywords:** Invertebrate Movement Channel Floodplain

**County:** All

**Title:** Movements of Invertebrates Between Stream Channels and Forested Floodplains

**Author:** Smock, L.A.

**Date:** 1994

**Publication/journal/publisher:** Journal of the North American Benthological Society 13: 524-531

**Type of document:** Journal

**Source of document / Search method (phone, internet, library, etc.):**
