INSTRUCTIONS

This form shall be executed, preferably typewritten, in triplicate and must be accompanied by a \$5.00 filing fee. Each triplicate copy must be properly signed and attested. If applicant is not recorded owner of water right, Change of Ownership affidavit must accompany this application. If additional space is required use a separate sheet or sheets and attach securely hereto.

Note: It is unlawful, after a transfer has been completed, to apply water on the lands or uses from which right has been severed, or to use more water than the owner had a valid right to use before change was made. Supplementary water rights, by their very nature, cease to exist for those lands from which rights are transferred; also they cannot be transferred to other lands as new or primary water rights.

All blanks in Sections 1--7 shall be filled out fully and accurately. Secs. 2--3 Describe all essential features of the water right or rights involved in the proposed change. Sec. 4 Explain fully why change is desired or necessary. Sec. 5 Describe well (or wells) to which change is to be made and, if an existing well, set forth any other rights appurtenant thereto. Sec. 6 Explain any features or conditions not made clear in previous sections. Sec. 8 This section, to be filled out by the State Engineer, gives his approval or disapproval of the application, the conditions under which approval is granted and sets the limiting date for completing such changes.

Important: The location of the point of diversion to be changed from, the well (or wells) to be changed to, and the acreage to be supplied from the latter must be shown as accurately as possible on the above plat.

Attachment, RG-9393 amending 01347

and further provided that:

- (1) Diversion of water from well RG-9393 shall be supplemental to surface water rights appurtenant to 1.45 acres of land described as 1.45 acres of land in the approximate center of the SE $\frac{1}{4}$ of Section 25, Township 19 North, Range 9 East, N.M.P.M., and further shown on Hydrographic Survey prepared under the direction of the State Engineer, and
- (2) Appropriation of water from all sources combined shall not exceed the average historical surface water supply available for farm delivery to the subject acreage from the Rio en Medio through the Questa ditch, and
- (3) The right to divert water from well RG-9393 for supplementary irrigation purposes on more than the 1.45 acres described in (1) above is hereby denied.
