Subject: RE: summaries of both public meetings

Lucy, John, etc.:

I have not reviewed the summaries for accuracy. I have not yet edited them or made them public record. The summaries have been reviewed for issue identification, and the issues are essentially the same as those identified by written comments.

Lucy,

I am not sure how widely you distributed these comments. However, the written comments received by the Navajo Nation and the State were distributed to the public earlier this week.

>Hello Folks -- I am sending summaries of both San Juan Basin water rights public meetings (you already got the Farmington one, but here it is again) for your review. If they look ok to you, I would like to send them to the email list of those who have come to our negotiating sessions. If you would rather keep them for your use in considering whether or not to change the draft, let me know.
