NOTE: If any of the lands to be changed from or to have water rights from any other source explain fully and furnish file numbers. File No. 01417, Town of Farmington has water rights as assigned from the San Juan Hydrographic Adjudication.

Remarks The ownership of this water right has been assigned to the Town of Farmington by its previous owner and this transfer is on file in the State Engineer's Office.

The undersigned, being duly sworn, upon my oath, state that I have read the foregoing statements and that the same are true to the best of my knowledge and belief.

TOWN OF FARMINGTON - Applicant

(Mayor)

Subscribed and sworn to before me this 1st day of May, A.D. 1963.

My commission expires: Jan. 15, 1965

Notary Public

C. APPROVAL OF THE STATE ENGINEER:

The number of this permit is 01417-4. Name of Paper Farmington Daily Times.

This application is approved provided it is not exercised to the detriment of any others having prior, valid and existing rights to the use of waters of this stream, system or to the detriment of any rights acquired prior to this application for permit to change place or method of use.

This application is approved for the change in point of diversion, place and purpose of use for a total annual diversion of 145.57 acre feet.

September 4th, 1963

Proof of Application of Water to Beneficial Use shall be filed on or before September 4th, 1968.

This is to certify that I have examined the above application to change of use of water and hereby approve the same subject to the foregoing provisions and conditions.

Witness my hand and seal this 4th day of September, A.D. 1964.

S. E. Reynolds

State Engineer

Water Rights Division

INSTRUCTIONS

(See Manual of Rules and Regulations)

This form shall be made out in duplicate and shall be accompanied by a filing map or maps showing the present and proposed uses of other pertinent data. A filing fee of $5.00 shall accompany this application.

If application is made to change place or method of use of water claimed under a water right established prior to March 16, 1907, a declaration of such old right substantiated by sworn affidavits together with a filing map must accompany this application or have been already filed in this-office, fully setting forth the right claimed (see Declaration of Old Right in Manual). A right established by license or permit from the State Engineer shall be referred to fully in making application to change.

A filing map prepared by a qualified registered professional engineer or land surveyor and showing the existing works, lands, etc., and the new developments requested in this application, together with necessary plans, statements, etc., must accompany this filing. If applicant is not original owner of said water right, a Change of Ownership affidavit together with a $1.00 filing fee must also accompany the application.

The first line of this form is for the State Engineer. Do not fill in this line or any part (C) following. The first part of the form, (A), is to set forth the essential features of the existing water right; the second part, (B), describes the changes requested; and the third, (C), gives the approval or disapproval of the State Engineer, the conditions under which such approval is granted, and establishes the limiting dates for completing such changes.

It is a misdemeanor to use more \( v \) or after the change than the owner had \( v \) right to use before the change was made.
APPLICATION FOR PERMIT TO CHANGE POINT OF DIVERSION

Surface Waters

Date of Receipt of Application: May 3, 1963

File No.: 01417-4

A. Name of Applicant: Town of Farmington
   Post Office: Box 900
   County: San Juan
   State: New Mexico

   Water right was acquired by beneficial use and is recorded in the State Engineer's Office under
   No. 01417 Priority date of water right: 1877 - No. 11

   Source of water supply: Animas River Via North Farmington Ditch
   (river, arroyo, spring, etc.)

   a tributary of: San Juan River

   Present point of diversion lies in the NE ¼ of the SE ¼ of Section 11
   Township 29N, Range 13W, N.M.P.M., at a point whence the
   SE Corner of section 11, Township 29N,
   Range 13W, bears S18°18' E 2583.0 feet distant.

   Quantity of water to be changed: 448.57 acre-feet applied on 32.516 acres of
   land located in: For Municipal Water Supply

B. Application is hereby made to change point of diversion under above claimed right for the following reasons:
   To centralize all present points of diversion enabling the use of one pumping facility.

   New point of diversion proposed under this application lies in the NW ¼ of the SE ¼ of
   section 15 Township 29N
   Range 13W, at a point whence the NW Corner of the SE
   of section 15 Township 29N
   Range 13W, bears NE 50° 37' Ditch 635.15
   NE 50° 37' Ditch 615.33 feet distant.

   Name of stream, spring, tributary, etc., from which diversion is to be made (if different from original):
   Animas River and/or existing Willett Ditch

   Description of new diversion dam (give construction material, type, dimensions, hydraulic properties, etc.):
   None

   Additional data (give dimensions, capacity, etc., of new canal section; also data on any other proposed works):
   will pump directly from the Animas River and/or the existing Willett Ditch.

   The undersigned, being duly sworn, upon my oath, state that I have read the foregoing statements
   and that the same are true to the best of my knowledge and belief.

   TOWN OF FARMINGTON

State Engineer

INSTRUCTIONS

By: [Signature]
Frank E. Irby
Chief
Water Rights Division

This form shall be made out in duplicate and shall be accompanied by a filing map showing the present and proposed points of diversion and other pertinent data. A filing fee of $5.00 shall accompany this application.

If application is made to change point of diversion of water claimed under a water right established prior to March 19, 1907, a declaration of such old right substantiated by sworn affidavits together with a filing map must accompany this application or have been already filed in this office, fully setting forth the right claimed (see Declaration of Old Right in Manual). A right established by license or permit from the State Engineer shall be referred to fully in making application to change.

The filing map accompanying this application shall be prepared by a qualified registered professional engineer or land surveyor and shall show existing point of diversion and other works and lands irrigated as well as the new point of diversion. All pertinent dimensions and details of the proposed diversion structure, together with size and alignment of the canal and field notes thereon from the new point of diversion to the point where the new work meets the existing canal, shall also be given. Ownership of the lands upon which the point of diversion and any other proposed new works lie shall be shown. If applicant is not original owner of water right, a Change of Ownership affidavit together with a filing fee of $1.00 must accompany this application.

The first line of this form is for the State Engineer. Do not fill in this line or any of part (C) following. The first part of the form, (A), is to set forth the essential features of the existing water right; the second part, (B), describes the changes requested; and the third, (C), gives the approval or disapproval of the State Engineer, the conditions under which such approval is granted, and establishes the limiting dates for completing such changes.

It is a misdemeanor to use more water after the change than the owner has a valid right to use before the change was made.

Proof of Completion of Works and Proof of Application of Water to Beneficial Use will be due in this office on or before September 4, 1972.

Very truly yours,

S. E. Reynolds
State Engineer

By:

M. B. Compton
Engineer
Water Rights Division

OSE-2374
Application for Permit to Change
PLACE OR METHOD OF USE OF SURFACE WATERS

Date of Receipt of Application: July 29, 1969
File No.: 01417-LA

A. Name of Applicant: City of Farmington
Post Office: Box 900
County: San Juan
State: New Mexico

Water right was acquired by beneficial use and is recorded in the State Engineer's office under No. 01417.
Water is at present used for irrigation purposes.
Priority date of water right: 1877 - No. 1-B
Quantity of water claimed under right: See attached
Quantity of water stored: 0 acre feet

Source of water supply: Animas River
(river, arroyo, spring, etc.)

a tributary of the San Juan River

Point of diversion or outlet from storage lies in the NW quarter of the SW
quarter of section: 32
Township: 30 N.
Range: 12 W.
N. M. P. M., at a point where the SW Corner of Section 31
Township: 30 N.
Range: 12 W.
bears S 71° 17' W.

6597.0 feet distant. STAR DITCH

(If used for manufacturing, power, mining, etc., purposes, give also horsepower generated and describe point of return to the stream.)

Description of area from which transfer is to be made:

NOTE: If any of the lands to be changed from or to have water rights from any other source explain fully and
furnish file numbers: File No. 01417. City of Farmington has water rights
as assigned from the San Juan Hydrographic Adjudication.

Remarks The ownership of this water right has been assigned to the
City of Farmington by its previous owner and this transfer is on
file in the State Engineer's Office.

The undersigned, being duly sworn, upon my oath, state that I have read the foregoing statements and that the
same are true to the best of my knowledge and belief.

City of Farmington
Applicant

By: Paul H. Mayor

Subscribed and sworn to before me this 24th day of October, A.D. 1970

My commission expires: 12/31/70

Notary Public

C. APPROVAL OF THE STATE ENGINEER:
The number of this permit is 01417-1 Name of Paper The Farmington Daily Times
Date of Receipt of Application July 29, 1969 Publisher's Affidavit filed Oct. 1, 1969
Notice of Publication issued Sept. 5, 1969 Approved February 18, 1970

This application is approved provided it is not exercised to the detriment of any others having prior, valid and
existing rights to the use of waters of this stream system or to the detriment of any rights acquired prior to this
application for permit to change place or method of use.

This application is approved for the changes in point of diversion,
place and purpose of use for a total annual diversion of 563.34
acre feet for municipal purposes.

Proof of Application of Water to Beneficial Use shall be filed on or before September 4, 1977

This is to certify that I have examined the above application to change
of use of water and hereby approve the same subject to the foregoing provisions and conditions.

Witness my hand and seal this 18th day of February, A.D. 1970

Water Rights Division

INSTRUCTIONS
(See Manual of Rules and Regulations)

This form shall be made out in duplicate and shall be accompanied by a filing map or maps showing the present
and proposed uses of other pertinent data. A filing fee of $5.00 shall accompany this application.

If application is made to change place or method of use of water claimed under a water right established prior
to March 19, 1957, a declaration of such old right substantiated by sworn affidavits together with a filing map must
accompany this application or have been already filed in this office, fully setting forth the right claimed (see Declara-
tion of Old Right in Manual). A right established by license or permit from the State Engineer shall be referred to
fully in making application to change.

A filing map prepared by a qualified registered professional engineer or land surveyor showing the existing
works, lands, etc., and the new developments requested in this application, together with necessary plans, statements, etc.,
must accompany this filing. If applicant is not original owner of said water right, a Change of Ownership affidavit
(see Declaration of Old Right in Manual), must accompany the application.

The first line of this form is for the State Engineer. Do not fill in this line or any part (C) following. The first
part of the form, (A), is to set forth the essential features of the existing water right; the second part, (B), describes
the changes requested; and the third, (C), gives the approval or disapproval of the State Engineer, the conditions under
which such approval is granted, and establishes the limiting dates for completing such changes.

It is a misdemeanor to use more water after the change than the owner had at a valid right to use before the change
was made.
APPLICATION FOR PERMIT TO CHANGE POINT OF DIVERSION

Surface Waters

Date of Receipt of Application: July 29, 1969
File No.: 01417-1 A

A. Name of Applicant: City of Farmington
Post Office: Farmington
County: San Juan
State: New Mexico

Water right was acquired by beneficial use and is recorded in the State Engineer's Office under
No. 01417
Priority date of water right: 1878 - No. 2-E

(see "Instructions"—second paragraph)

Source of water supply: Animas River
(river, arroyo, spring, etc.)

a tributary of the San Juan River

Present point of diversion lies in the NW 1/4 of the SW 1/4 of Section 32
Township 30 N., Range 12 W., N.M.P.M., at a point whence the
SW corner of Section 31 Township 30 N.,
Range 12 W., bears S 72° 17' W., 6597.0 feet distant.

Quantity of water to be changed: 562.34 acre-feet applied on 175.17 acres of
land located in "See attached"

B. Application is hereby made to change point of diversion under above claimed right for the following reasons: "See attached"

New point of diversion proposed under this application lies in the See attached 1/4 of the
1/4 of the

Range ___________ Township ___________

at a point whence the

of section ___________ Township ___________, Range ___________

bears ___________ feet distant.

Name of stream, spring, tributary, etc., from which diversion is to be made (if different from original)
Animas River

Description of new diversion dam (give construction material, type, dimensions, hydraulic properties,

Ditch for Hydro Pumping Station.

None

Additional data (give dimensions, capacity, etc., of new canal section; also data on any other proposed works)

The undersigned, being duly sworn, upon my oath, state that I have read the foregoing statements
and that the same are true to the best of my knowledge and belief.

My commission expires 2/18/30

Notary Public
Number of this Permit 01417-1 A Name of Paper The Farmington Daily Times

Date of Receipt of Application July 29, 1969 Publisher's Affidavit Filed Oct. 1, 1969

Notice of Publication Issued Sept. 5, 1969 Approved February 18, 1970

This application is approved provided it is not exercised to the detriment of any others having prior, valid and existing rights to the use of the waters of this stream or to the detriment of any rights acquired prior to this application for permit to change point of diversion.

This application is approved for the changes in point of diversion, place and purpose of use for a total annual diversion of 563.34 acre feet for municipal purposes.

Proof of completion of works shall be filed on or before September 4, 1972

This is to certify that I have examined the above application to change point of diversion and hereby approve the same subject to the foregoing provisions and conditions.

Witness my hand and seal this 18th day of February, A.D., 1970

S. E. Reynolds
State Engineer

INSTRUCTIONS
(See Manual of Rules and Regulations)

This form shall be made out in duplicate and shall be accompanied by a filing map showing the present and proposed points of diversion and other pertinent data. A filing fee of $5.00 shall accompany this application.

If application is made to change point of diversion of water claimed under a water right established prior to March 19, 1907, a declaration of such old right substantiated by sworn affidavits together with a filing map must accompany this application or have been already filed in this office, fully setting forth the right claimed (see Declaration of Old Right in Manual). A right established by license or permit from the State Engineer shall be referred to fully in making application to change.

The filing map accompanying this application shall be prepared by a qualified registered professional engineer or land surveyor and shall show existing point of diversion and other works and lands irrigated as well as the new point of diversion. All pertinent dimensions and details of the proposed diversion structure, together with size and alignment of the canal and field notes thereon from the new point of diversion to the point where the new work meets the existing canal, shall also be given. Ownership of the lands upon which the point of diversion and any other proposed new works lie shall be shown. If applicant is not original owner of water right, a Change of Ownership affidavit together with a filing fee of $1.00 must accompany this application.

The first line of this form is for the State Engineer. Do not fill in this line or any part of (C) following. The first part of the form, (A), is to set forth the essential features of the existing water right; the second part, (B), describes the changes requested; and the third, (C), gives the approval or disapproval of the State Engineer, the conditions under which such approval is granted, and establishes the limiting dates for completing such changes.

It is a misdemeanor to use more water after the change than the owner has a valid right to use before the change was made.

OSE-2378
The City of Farmington wishes to establish equal alternate points of diversion, because it supplies water to its municipal users from the several diversion points listed.

The City wishes to change the present point of diversion at the head of the Star Ditch, located in the NW\(\frac{1}{4}\)SW\(\frac{1}{4}\) of Section 32, Township 30 North, Range 12 West, whence the SW corner of Section 31, Township 30 North, Range 12 West bears S 71° 17' W, 6597.0 feet distant, and to establish the Farmers Ditch and the Hydro Pumping Station, which are described below, as equal alternate points of diversion.

(1) Point of diversion of the Farmers Ditch lies in the SW\(\frac{1}{4}\)NE\(\frac{1}{4}\) of Section 21, Township 31 North, Range 11 West, whence the West quarter corner of said Section 21 bears S 82° 47' W, 935 feet distant.

(2) The Municipal pumping plant is located on the Animas River in the NW\(\frac{1}{4}\)SE\(\frac{1}{4}\) of Section 15, Township 29 North, Range 13 West, whence the NW corner of the SE\(\frac{1}{4}\) of said Section 15 bears N 82° 22' E, 634.35 feet distant; and the alternate pumping station is located on the Willett Ditch in the NW\(\frac{1}{4}\)SE\(\frac{1}{4}\) of Section 15, Township 29 North, Range 13 West, whence the NW corner of the SE\(\frac{1}{4}\) of said Section 15 bears N 69° 21' E, 615.33 feet distant.

Application for Permit to Change
PLACE OR METHOD OF USE OF SURFACE WATERS

Date of Receipt of Application: July 29, 1969
File No. 01417-2A

A. Name of Applicant: City of Farmington
Post Office: Box 900
County of: San Juan
State of: New Mexico

Water right was acquired by beneficial use and is recorded in the State Engineer's office under No. 01417
Water is at present used for irrigation purposes.
(Irrigation, power, municipal, etc.)

Priority date of water right: 1891 - No. 8-A
Quantity of water claimed under right: See attached
Quantity of water stored: 0 acre feet.

Source of water supply: Animas River
A tributary of the San Juan River
(Point of diversion or outlet from storage) lies in the NE quarter of the NE.

Quarter of section: 18
Township: 30 N.
Range: 11 W.

N. M. P. M., at a point whence the NW corner of Section 18 bears N. 76° 10' W., 4290.0 feet distant. HALFORD-INDEPENDENT DITCH
(If used for manufacturing, power, mining, etc. purposes, give also horsepower generated and describe point of return to the stream.)

Description of area from which transfer is to be made:

SUBDIVISION | SEC | TWP | RANGE | ACRES | OWNER
--- | --- | --- | --- | --- | ---
See attached

Description of area to which transfer is to be made:

SUBDIVISION | SEC | TWP | RANGE | ACRES | OWNER
--- | --- | --- | --- | --- | ---
City of Farmington municipal water system

B. Application is hereby made for permit to change place or method of use of water under above described right for the following reasons: The City of Farmington supplies water to this property through its municipal water distribution system and the irrigation by the Owner has been discontinued in lieu of the use of the municipal water. Use to which water is to be transferred municipal purposes.

Quantity of water to be transferred: See attached acre feet.

Description of area to which transfer is to be made:

SUBDIVISION | SEC | TWP | RANGE | ACRES | OWNER
--- | --- | --- | --- | --- | ---

from File OSE-2383
NOTE: If any of the lands to be changed from or to have water rights from any other source explain fully and
furnish file numbers: File No. 01417. City of Farmington has water rights.

as assigned from the San Juan Hydrographic Adj udication.

Remarks: The ownership of this water right has been assigned to the
City of Farmington by its previous owner and this transfer is on
file in the State Engineer's Office.

The undersigned, being duly sworn, upon my oath, state that I have read the foregoing statements and that the
same are true to the best of my knowledge and belief.

C. APPROVAL OF THE STATE ENGINEER:

The number of this permit is 01417-2.

A Name of Paper The Farmington Daily Times

Date of Receipt of Application July 29, 1969, Publisher's Affidavit filed Oct. 1, 1969

This application is approved provided it is not exercised to the detriment of any others having prior, valid and
existing rights to the use of waters of this stream system or to the detriment of any rights acquired prior to this
application for permit to change place or method of use.

This application is approved for the changes in point of diversion,
place and purpose of use for a total annual diversion of 494.28
acre feet for municipal purposes.

Proof of Application of Water to Beneficial Use shall be filed on or before September 4, 1972.

This is to certify that I have examined the above application to change
of use of water and hereby approve the same subject to the foregoing provisions and conditions.

Witness my hand and seal this 18th day of February, A.D., 1970.

INSTRUCTIONS

M. E. Compton
Engineer

(See Manual of Rules and Regulations) Water Rights Division

This form shall be made out in duplicate and shall be accompanied by a filing map showing the present and proposed points of diversion and other pertinent data. A filing fee of $5.00 shall accompany this application.

If application is made to change point of diversion of water claimed under a water right established prior to March 19, 1907, a declaration of such old right substantiated by sworn affidavits together with a filing map must accompany this application or have been already filed in this office, fully setting forth the right claimed (see Declaration of Old Right in Manual). A right established by license or permit from the State Engineer shall be referred to fully in making application to change.

The filing map accompanying this application shall be prepared by a qualified registered 'professional' engineer or land surveyor and shall show existing point of diversion and other works and lands irrigated as well as the new point of diversion. All pertinent dimensions and details of the proposed diversion structure, together with size and alignment of the canal and field notes thereon from the new point of diversion to the point where the new work meets the existing canal, shall also be given. Ownership of the lands upon which the point of diversion and any other proposed new works lie shall be shown. If applicant is not original owner of water right, a Change of Ownership affidavit together with a filing fee of $1.00 must accompany this application.

The first line of this form is for the State Engineer. Do not fill in this line or any of part (C) following. The first part of the form, (A), is to set forth the essential features of the existing water right; the second part, (B), describes the changes requested; and the third, (C), gives the approval or disapproval of the State Engineer, the conditions under which such approval is granted, and establishes the limiting dates for completing such changes.

It is a misdemeanor to use more water after the change than the owner has a valid right to use before the change was made.

OSE-2386
The City of Farmington wishes to establish equal alternate points of diversion, because it supplies water to its municipal users from the several diversion points listed.

The City desires to retain the present point of diversion for these waters, and in addition wishes to add the Farmers Ditch and the Hydro Pumping Station, which are described below, as equal alternate diversion points.

(1) Point of diversion of the Farmers Ditch lies in the SW¼NW¼ of Section 21, Township 31 North, Range 11 West, whence the West quarter corner of said Section 21 bears S. 82° 47' W., 935 feet distant.

(2) The Municipal pumping plant is located on the Animas River in the NW¼SE¼ of Section 15, Township 29 North, Range 13 West, whence the NW corner of the SE¼ of said Section 15 bears N. 82° 22' E., 634.35 feet distant; and the alternate pumping station is located on the Willett Ditch in the NW¼SE¼ of Section 15, Township 29 North, Range 13 West, whence the NW corner of the SE¼ of said Section 15 bears North 69° 21' E., 615.33 feet distant.

NOTE: If any of the lands to be changed from or to have water rights from any other source explain fully and furnish file numbers: File No. 01417, City of Farmington has water rights as assigned from the San Juan Hydrographic Adjudication.

 Remarks The ownership of this water right has been assigned to the City of Farmington by its previous owner and this transfer is on file in the State Engineer's Office.

The undersigned, being duly sworn, upon my oath, state that I have read the foregoing statements and that the same are true to the best of my knowledge and belief.

City of Farmington  Applicant
by: Paul | Mayor

Subscribed and sworn to before me this 24th day of July A. D. 1970

My commission expires: 01/18/70

William L. Williamson Notary Public

C. APPROVAL OF THE STATE ENGINEER:

The number of this permit is 01417-3 A. Name of Paper The Farmington Daily Times

Date of Receipt of Application July 29, 1969 Publisher's Affidavit filed Oct. 1, 1969

Notice of Publication issued Sept. 5, 1969 Approved February 18, 1970

This application is approved provided it is not exercised to the detriment of any others having prior, valid and existing rights to the use of waters of this stream system or to the detriment of any rights acquired prior to this application for permit to change place or method of use.

This application is approved for the changes in point of diversion, place and purpose of use for a total annual diversion of 85.08 acre feet for municipal purposes.

Proof of Application of Water to Beneficial Use shall be filed on or before September 4, 1972

This is to certify that I have examined the above application to change of use of water and hereby approve the same subject to the foregoing provisions and conditions.

Witness my hand and seal this 18th day of February A. D. 1970

S. E. Reynolds
State Engineer

INSTRUCTIONS
(See Manual of Rules and Regulations)

This form shall be made out in duplicate and shall be accompanied by a filing map or maps showing the present and proposed uses of other pertinent data. A filing fee of $5.00 shall accompany this application.

If application is made to change place or method of use of water claimed under a water right established prior to March 19, 1907, a declaration of such old right substantiated by sworn affidavits together with a filing map must accompany this application or have been already filed in this office, fully setting forth the right claimed (see Declaration of Old Right in Manual). A right established by license or permit from the State Engineer shall be referred to fully in making application to change.

A filing map prepared by a qualified registered professional engineer or land surveyor showing the existing works, lands, etc. and the new developments requested in this application, together with necessary plans, statements, etc. must accompany this filing. If applicant is not original owner of said water right, a Change of Ownership affidavit together with a $1.00 filing fee must also accompany the application.

The first line of this form is for the State Engineer. Do not fill in this line or any part (C) following. The first part of the form, (A), is to set forth the essential features of the existing water right: the second part, (B), describes the changes requested; and the third, (C), gives the approval or disapproval of the State Engineer, the conditions under which such approval is granted, and establishes the limiting dates for completing such changes.

It is a misdemeanor to use more water after the change than the owner had a valid right to use before the change was made.
APPLICATION FOR PERMIT TO CHANGE POINT OF DIVERSION

Date of Receipt of Application: July 29, 1969
File No. 01417-3 A

A. Name of Applicant: City of Farmington
Post Office: Farmington, County of San Juan
State of New Mexico

Water right was acquired by beneficial use and is recorded in the State Engineer's Office under No. 01417. Priority date of water right: 1877 - No. 1-E

Source of water supply: Animas River
(river, arroyo, spring, etc.)

a tributary of the San Juan River

Present point of diversion lies in the NE 1/4 of the SE 1/4 of Section 11.

Township 29 N, Range 13 W, N.M.P.M., at a point whence the SE corner of section 11, Township 29 N,

Range 13 W., bears S 18° 18' E, 2530.0 feet distant.

Quantity of water to be changed: 85.08 acre-feet applied on 18.51 acres of land located in See attached.

B. Application is hereby made to change point of diversion under above claimed right for the following reasons: See attached.

New point of diversion proposed under this application lies in the NE 1/4 of the SE 1/4 of Section 11. Township

Range ______, at a point whence the

of section ______ Township ______ Range ______

bears ______ feet distant.

Name of stream, spring, tributary, etc., from which diversion is to be made (if different from original):
Animas River

Description of new diversion dam (give construction material, type, dimensions, hydraulic properties, etc.): None; existing facilities at Farmers Ditch and Willeit Ditch for Hydro Pumping Station.

Additional data (give dimensions, capacity, etc., of new canal section; also data on any other proposed works): None.

The undersigned, being duly sworn, upon my oath, state that I have read the foregoing statements and that the same are true to the best of my knowledge and belief.

City of Farmington, Applicant,

Subscribed and sworn to before me this 24th day of July, A.D. 1969.

My commission expires 2/18/70

Notary Public
C. Approval of the State Engineer

Number of this Permit: 01417-3 A  Name of Paper: The Farmington Daily Times
Date of Receipt of Application: July 29, 1969  Publisher's Affidavit Filed: Oct. 1, 1969

This application is approved provided it is not exercised to the detriment of any others having prior, valid and existing rights to the use of the waters of this stream or to the detriment of any rights acquired prior to this application for permit to change point of diversion.

This application is approved for the changes in point of diversion, place and purpose of use for a total annual diversion of 85.08 acre feet for municipal purposes.

Proof of completion of works shall be filed on or before September 4, 1972

This is to certify that I have examined the above application to change point of diversion and hereby approve the same subject to the foregoing provisions and conditions.

Witness my hand and seal this 18th day of February 1970, A.D.

S. E. Reynolds
State Engineer

INSTRUCTIONS

(See Manual of Rules and Regulations)

Engineer

Water Rights Division

This form shall be made out in duplicate and shall be accompanied by a filing map showing the present and proposed points of diversion and other pertinent data. A filing fee of $5.00 shall accompany this application.

If application is made to change point of diversion of water claimed under a water right established prior to March 19, 1907, a declaration of such old right substantiated by sworn affidavits together with a filing map must accompany this application or have been already filed in this office, fully setting forth the right claimed (see Declaration of Old Right in Manual). A right established by license or permit from the State Engineer shall be referred to fully in making application to change.

The filing map accompanying this application shall be prepared by a qualified registered professional engineer or land surveyor and shall show existing point of diversion and other works and lands irrigated as well as the new point of diversion. All pertinent dimensions and details of the proposed diversion structure, together with size and alignment of the canal and field notes thereon from the new point of diversion to the point where the new work meets the existing canal, shall also be given. Ownership of the lands upon which the point of diversion and any other proposed new works lie shall be shown. If applicant is not original owner of water right, a Change of Ownership affidavit together with a filing fee of $1.00 must accompany this application.

The first line of this form is for the State Engineer. Do not fill in this line or any part of (C) following. The first part of the form, (A), is to set forth the essential features of the existing water right; the second part, (B), describes the changes requested; and the third, (C), gives the approval or disapproval of the State Engineer; the conditions under which such approval is granted, and establishes the limiting dates for completing such changes.

It is a misdemeanor to use more water after the change than the owner has a valid right to use before the change was made.

Quality Processing Fe

OSE-2394
The City of Farmington wishes to establish equal alternate points of diversion, because it supplies water to its municipal users from the several diversion points listed.

The City desires to retain the present point of diversion for these waters, and in addition wishes to add the Farmers Ditch and the Hydro Pumping Station, which are described below, as equal alternate diversion points.

(1) Point of diversion of the Farmers Ditch lies in the SW¼NW¼ of Section 21, Township 31 North, Range 11 West, whence the West quarter corner of said Section 21 bears S 82° 47' W, 935 feet distant.

(2) The Municipal pumping plant is located on the Animas River in the NW¼SE¼ of Section 15, Township 29 North, Range 13 West, whence the NW corner of the SE¼ of said Section 15 bears N 82° 22' E, 634.35 feet distant; and the alternate pumping station is located on the Willett Ditch in the NW¼SE¼ of Section 15, Township 29 North, Range 13 West, whence the NW corner of the SE¼ of said Section 15 bears N 69° 21' E, 615.33 feet distant.

NOTE: If any of the lands to be changed from or to have water rights from any other source explain fully and in detail. File No. 01417, City of Farmington has water rights as assigned from the San Juan Hydrographic Adjudication.

Remarks The ownership of this water right has been assigned to the City of Farmington by its previous owner and this transfer is on file in the State Engineer's Office.

The undersigned, being duly sworn, upon my oath, state that I have read the foregoing statements and that the same are true to the best of my knowledge and belief.

City of Farmington

Applicant

By: Paul E. Weaver

Subscribed and sworn to before me this 24th day of July A.D. 1970

Notary Public

My commission expires: 3/1/70

C. APPROVAL OF THE STATE ENGINEER:

The number of this permit is 01417-4 A Name of Paper The Farmington Daily Times

Date of Receipt of Application July 29, 1969 Publisher's Affidavit filed Oct. 1, 1969

Notice of Publication issued Sept. 5, 1969 Approved February 18, 1970

This application is approved provided it is not exercised to the detriment of any others having prior, valid and existing rights to the use of waters of this stream system or to the detriment of any rights acquired prior to this application for permit to change place or method of use.

This application is approved for the changes in point of diversion, place and purpose of use for a total annual diversion of 339.54 acre feet for municipal purposes.

Proof of Application of Water to Beneficial Use shall be filed on or before September 4, 1972

This is to certify that I have examined the above application to change of use of water and hereby approve the same subject to the foregoing provisions and conditions.

Witness my hand and seal this 18th day of February A.D. 1970

INSTRUCTIONS

(See Manual of Rules and Regulations)

This form shall be made out in duplicate and shall be accompanied by a filing map or maps showing the present and proposed uses of other pertinent data. A filing fee of $3.00 shall accompany this application.

If application is made to change place or method of use of water claimed under a water right established prior to March 31, 1897, a declaration of such old right substantiated by sworn affidavits together with a filing map must accompany this application or have been already filed in this office, fully setting forth the right claimed (see Declaration of Old Right in Manual). A right established by license or permit from the State Engineer shall be referred to fully in making application to change.

A filing map prepared by a qualified registered professional engineer or land surveyor and showing the existing works, lands, etc., and the new developments requested in this application, together with necessary plans, statements, etc., must accompany this filing. If the applicant is not original owner of said water right, a Change of Ownership affidavit together with a $1.00 filing fee must also accompany the application.

The first line of this form is for the State Engineer. Do not fill in this line or any part (C) following. The first part of the form, (A), is to set forth the essential features of the existing water right; the second part, (B), describes the changes requested; and the third, (C), gives the approval or disapproval of the State Engineer, the conditions under which such approval is granted, and establishes the limiting dates for completing such changes.

If it is a misdemeanor to use more water after the change than the owner had a valid right to use before the change was made.
APPLICATION FOR PERMIT TO CHANGE POINT OF DIVERSION

Surface Waters

Date of Receipt of Application July 29, 1969 File No. 01417-4 A

A. Name of Applicant City of Farmington

Post Office Farminaton, County of San Juan

State of New Mexico

Water right was acquired by beneficial use and is recorded in the State Engineer's Office under No. 01417 Priority date of water right 1897 - No. 11

(see "Instructions"—second paragraph)

Source of water supply Animas River
(river, arroyo, spring, etc.)

a tributary of San Juan River

Present point of diversion lies in the NE ¼ of the SE ¼ of Section 11

Township 29 N., Range 13 W., N.M.P.M., at a point whence the SE corner of section 11 Township 29 N.,
Range 13 W. bears S 18° 18' E. 2583.0 feet distant.

Quantity of water to be changed 339.54 acre-feet applied on 106.45 acres of land located in See attached 1/5

B. Application is hereby made to change point of diversion under above claimed right for the following reasons: See attached

New point of diversion proposed under this application lies in the See attached 1/4 of the 1/4 of section_, Township

Range _, at a point whence the of section Township Range bear feet distant.

Name of stream, spring, tributary, etc., from which diversion is to be made (if different from original) Animas River

Description of new diversion dam (give construction material, type, dimensions, hydraulic properties, etc.) None: facilities exist at Farmers Ditch and at Willett Ditch for Hydro Pumping Station.

Additional data (give dimensions, capacity, etc., of new canal section; also data on any other proposed works) None.

The undersigned, being duly sworn, upon my oath, state that I have read the foregoing statements and that the same are true to the best of my knowledge and belief.

S. E. Reynolds
State Engineer

INSTRUCTIONS

By: M. B. Compton
Engineer
Water Rights Division

(See Manual of Rules and Regulations)

This form shall be made out in duplicate and shall be accompanied by a filing map showing the present and proposed points of diversion and other pertinent data. A filing fee of $5.00 shall accompany this application.

If application is made to change point of diversion of water claimed under a water right established prior to March 18, 1907, a declaration of such old right substantiated by sworn affidavits together with a filing map must accompany this application or have been already filed in this office, fully setting forth the right claimed (see Declaration of Old Right in Manual). A right established by license or permit from the State Engineer shall be referred to fully in making application to change.

The filing map accompanying this application shall be prepared by a qualified registered professional engineer or land surveyor and shall show existing point of diversion and other works and lands irrigated as well as the new point of diversion. All pertinent dimensions and details of the proposed diversion structure, together with size and alignment of the canal and field notes thereon from the new point of diversion to the point where the new work meets the existing canal, shall also be given. Ownership of the lands upon which the point of diversion and any other proposed new works lie shall be shown. If applicant is not original owner of water right, a Change of Ownership affidavit together with a filing fee of $1.00 must accompany this application.

The first line of this form is for the State Engineer. Do not fill in this line or any of part (C) following. The first part of the form, (A), is to set forth the essential features of the existing water right; the second part, (B), describes the changes requested; and the third, (C), gives the approval or disapproval of the State Engineer, the conditions under-which such approval is granted, and establishes the limiting dates for completing such changes.

It is a misdemeanor to use more water after the change than the owner has a valid right to use before the change was made.
The City of Farmington wishes to establish equal alternate points of diversion, because it supplies water to its municipal users from the several diversion points listed.

The City desires to retain the present point of diversion for these waters, and in addition wishes to add the Farmers Ditch and the Hydro Pumping Station, which are described below, as equal alternate diversion points.

(1) Point of diversion the Farmers Ditch lies in the SW¼NW¼ of Section 21, Township 31 North, Range 11 West, whence the West quarter corner of said Section 21 bears S 82° 47' W, 935 feet distant.

(2) The Municipal pumping plant is located on the Animas River in the NW¼SE¼ of Section 15, Township 29 North, Range 13 West, whence the NW corner of the SE¼ of said Section 15 bears N 82° 22' E, 634.35 feet distant; and the alternate pumping station is located on the Willett Ditch in the NW¼SE¼ of Section 15, Township 29 North, Range 13 West, whence the NW corner of the SE¼ of said Section 15 bears N 69° 21' E, 615.33 feet distant.

OS-2405
June 25, 1964

S. E. Reynolds, State Engineer

M. B. Compton, Surface Water Rights Supervisor

Town of Farmington Water Rights

1. On April 8, 1948, the First Judicial District Court of New Mexico, within and for San Juan County, under Cause No. 01690, The Echo Ditch Company, et al, Plaintiffs, vs. The McDermott Ditch Company, et al, Defendants, adjudicated the existing water rights from the Las Animas and San Juan Stream Systems.

This adjudication established that the Town of Farmington has the following rights to the use of water: (Page 64)

"26 - TOWN OF FARMINGTON WATER

That the Town of Farmington, New Mexico, is the owner of a water right for the right to ten (10) cubic feet of water per second of time, continuous flow, from the water of the Animas River, with priority dating from 1877, diverted from the said River by means of and carried through the Halford-Independent Ditch, for use in the Municipal water system of said Town of Farmington, to supply the residents and business institutions of said Town, for domestic purposes and special industrial institutions as supplied by the Town; and,

That the said Town of Farmington is the owner of a water right for water from the Animas River, in the amount of 10,528.68 acre feet, owned by said Town in trust for the use and benefits of the owners of lots and parcels of land situated within the corporate limits of said Town, for the use of the irrigation of said lots and parcels of land; that the said water is diverted from the Animas River by and through the Halford-Independent Ditch, the Star Ditch, and the Wright-Legget Ditch and the North Farmington Ditch, with priority dating from the respective priority dates of said several ditches, as set more specifically in the individual findings in these recommendations named for the said four (4) respective ditches.

That the aforesaid water rights are valid subsisting water rights, appurtenant to the said respective parcels or tracts of land, for the uses and purposes aforesaid, all dating from
the year 1877; that the water for the said uses shall be and remain appurtenant to the respective tracts for which the same originally was appropriated and used, and now is used, unless the right to the use of said water under said respective water rights hereafter are declared forfeited by reason of non-use thereof, or for other lawful cause, under the statutes of the State of New Mexico in such case made and provided; Provided, However, that the transfer of such water right to other lands as appurtenant thereto, or for other uses than those to which the same are adjudicated herein, may be made in the manner now, or hereafter, prescribed by the statutes of the State of New Mexico in such case made and provided."

The specific findings of the above named court decree set priorities and amounts as follows for the trusteeship:

<table>
<thead>
<tr>
<th>Name of Ditch</th>
<th>Priority Date</th>
<th>Rate</th>
<th>Quantity per annum</th>
</tr>
</thead>
<tbody>
<tr>
<td>Star Ditch</td>
<td>1877</td>
<td>10.47 cfs</td>
<td>2581.2 Ac.Ft.</td>
</tr>
<tr>
<td>Wright-Leggett</td>
<td>1878</td>
<td>10.5</td>
<td>2568.2</td>
</tr>
<tr>
<td>Independent</td>
<td>1891</td>
<td>8.76</td>
<td>2141.9</td>
</tr>
<tr>
<td>North Farmington</td>
<td>1897</td>
<td>14.1</td>
<td>3464.5</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>1897</strong></td>
<td><strong>21.69 cfs</strong></td>
<td><strong>10,755.8 Ac.Ft.</strong></td>
</tr>
</tbody>
</table>

Note: The 2nd paragraph of adjudicated rights lists amount as 10,528.68 acre feet compared to 10,755.8 acre feet listed under individual ditches. (Some 856 acre feet of water under the ditches has been assigned to the Town by owners of the land.)

Major storage works at time of decree consisted of an 80 acre feet capacity reservoir.

2. On July 7, 1958 the Town of Farmington obtained Permit No. 2827 covering the pumping plant located near the power plant so that water could be diverted from either the Animas River or Willett Ditch for the purpose of supplying water to the Town. This permit was approved as an additional point of diversion with total combined diversion to Town’s municipal supply not to exceed their rights adjudicated in Cause No. 01690.

3. On December 23, 1960 the Town of Farmington obtained Permit No. 2995 covering a storage reservoir of 6,703 acre feet to be filled through the Farmers Ditch and for the appropriation of 7,200 acre feet of water per annum measured at the outlet from
storage. Rate of diversion into reservoir is set at 50 cfs. Priority of this permit is August 20, 1959.

4. Recorded use by Town is as follows:

MBC: M. B. Compton
IN THE FIRST JUDICIAL DISTRICT COURT OF NEW MEXICO, WITHIN AND FOR SAN JUAN COUNTY.

THE ECHO DITCH COMPANY, et al, Plaintiffs,

— vs —

No. 01690.

JUDGMENT.

This cause coming on for hearing, in open Court, at the regular April 8, A. D., 1948, term of said court held at Aztec, San Juan County, New Mexico, on said date, upon the Referee's Report of George F. Bruington, Esquire, filed herein; and the Plaintiffs appearing herein by their attorneys G. W. R. Hoy and J. Murray Palmer, and none of the Defendants appearing herein either in person or by attorney; and the court having considered the Report of the said Referee, together with all and singular the pleadings and papers filed herein; and it appearing to the Court from the record herein,

That on October 13, 1937, the court appointed as its Referee in this cause George F. Bruington, Esquire, to hold hearings for the taking of evidence and the testimony of witnesses; to make Findings of Facts and Conclusions of Law concerning the water rights of each and every party Plaintiff and defendant herein, and all of the Unknown Claimants of water rights in this cause, and to Report the same unto the court, together with the evidence and testimony adduced before said Referee at such hearings; and,

That the said Referee by his said Report showing unto the Court that from time to time during the period intervening since the appointment of said Referee and the filing herein of his said Referee's Report, the said Referee held numerous and protracted hearings, at which was adduced a vast amount of testimony of a large number of witnesses, and much documentary evidence introduced, including the Hydrographic Survey and Report prepared and filed herein by the Honorable Thos. F. McClure, State Engineer of the State of New Mexico, a full, complete, and correct transcription of all of the testimony of said witnesses given before the said Referee, together with the original and certified copies of all documents introduced as evidence, and stipulations made in said hearings before said Referee, and the said Hydrographic Survey and Report of the said State Engineer; and,

From the testimony and evidence so adduced before the said Referee, as aforesaid, the said Referee has made Findings of Fact and Conclusion of Law thereon, all of which are set out fully in said Referee's Report filed herein; and that for convenience, clarity, brevity, and easier reference the said Report is divided into two (2) classes of findings, namely: 1. GENERAL FINDINGS, and 2. SPECIFIC FINDINGS; and it appearing to the court that for the purposes aforesaid the findings in this Decree should be and are classified as given in said Referee's Report, as aforesaid, to-wit:

1. GENERAL FINDINGS, which relate to the water of the Streams System of the San Juan River in the State of New Mexico, and which said General Findings apply to all of the ditches, diversions works, reservoirs, and other devices heretofore used for diverting and applying the waters of streams system of the San Juan River in the State of New Mexico, to beneficial uses in the State of New Mexico; and,

2. SPECIFIC FINDINGS, which relate to each specific community ditch and other ditches, and all and singular the water rights and waters diverted from said streams system and applied to beneficial uses together with the reservoirs, individual ditches, and all other structures and devices heretofore and now used for diverting and applying waters of the streams system of said San Juan River and its tributaries to beneficial uses in the State of New Mexico.
declared forfeited by reason of non-use thereof, or for other lawful cause, under the statutes of the State of New Mexico in such case made and provided; Provided, However, that the transfer of such water right to other lands as appurtenant thereto, or for other uses than those to which the same are adjudicated herein, may be made in the manner now, or hereafter, prescribed by the statutes of the State of New Mexico in such cases made and provided.

26. TOWN OF FARMINGTON WATER.

That the Town of Farmington, New Mexico, is the owner of a water right for the right to ten (10) cubic feet of water per second of time, continuous flow, from the water of the Animas River, with priority dating from 1877, diverted from the said River by means of and carried through the Halford-Independent Ditch, for use in the Municipal water system of said Town of Farmington, to supply the residents and business institutions of said Town, for domestic purposes and special industrial institutions as supplied by the Town; and,

That the said Town of Farmington is the owner of a water right for water from the Animas River, in the amount of 10,528.68 acre feet, owned by said Town in trust for the use and benefits of the owners of lots and parcels of land situated within the corporate limits of said Town, for the use of the irrigation of said lots and parcels of land; that the said water is diverted from the Animas River by and through the Halford-Independent Ditch, the Star Ditch, and the Wright-Leggatt Ditch and the North Farmington Ditch, with priority dating from the respective priority dates of said several ditches, as set more specifically in the individual findings in these recommendations named for the said four (4) respective ditches.

That the aforesaid water rights are valid subsisting water rights, appurtenant to the said respective parcels or tracts of land, for the uses and purposes aforesaid, all dating from the year 1877; that the water for the said uses shall be and remain appurtenant to the respective tracts for which the same originally was appropriated and used, and now is used, unless the right to the use of said water under said respective water rights hereafter are declared forfeited by reason of non-use thereof, or for other lawful cause, under the statutes of the State of New Mexico in such case made and provided; Provided, However, that the transfer of such water right to other lands as appurtenant thereto, or for other uses than those to which the same are adjudicated herein, may be made in the manner now, or hereafter, prescribed by the statutes of the State of New Mexico in such case made and provided.

27. TOWN OF AZTEC WATER.

That the Town of Aztec is the owner of a water right for waters from the Las Animas River, diverted from said River by and carried through the Lower Animas Ditch; which said water is used for domestic purposes and for the irrigation of lots, parcels and tracts of land situate in the said town of Aztec served by said Ditch; that the amount of water allotted to and delivered in the amount of 862.5 acre feet is greater than the amount allotted to larger tracts of agricultural lands for the irrigation thereof for the reason that in the application of the waters to said parcels and tracts of land in said town for irrigation purposes, covering approximately 604 lots and tracts, with consequent loss of such water caused by reason of such subdivision thereof; and that the said water right has a priority date of January 1877 for both irrigation and domestic use.

Plat of the said Town is shown under Exhibit No. 39, and testimony in support of use is shown at page 333, 334, 335, and 336 of Testimony in Volume No. 1; and pages 315, and 326 of Volume 3 of Testimony in this cause.

That the aforesaid water rights are valid subsisting water rights, appurtenant to the said respective parcels or tracts of land, for the uses and purposes aforesaid, all dating from the year 1877; that the water for the said uses shall be and remain appurtenant to the respective tracts for which the same originally was appropriated and used, and now is used, unless the right to the use of said water under said respective water rights hereafter are declared forfeited by reason of non-use thereof, or for other lawful cause, under the statutes of the State of New Mexico in such case made and provided; Provided, However, that the transfer of such water right to other land as appurtenant thereto, or for other uses than those to which the same are adjudicated herein, may be made in the manner now, or hereafter, prescribed by the statutes of the State of New Mexico in such case made and provided.
ADJUDICATED RIGHTS OF INDIVIDUAL CANALS, DITCHES, CARRIERS AND RESERVOIRS, AND LAND OWNERS USING WATERS THEREUNDER OR THEREFROM IN CAUSE NO. 01690, DISTRICT COURT, SAN JUAN COUNTY, NEW MEXICO

Name of Ditch, Carrier or Reservoir: Independent Ditch.

Type of Organization: Community.

Source of Water Supply: Las Animas River.

Diversion Priority Date: 1891. Priority No. 8-A.

Maximum Rate of Diversion at Headgate or Intake of Ditch in Cubic Feet per Second of Time for Irrigation Purposes: 63.20 including 8.76 cu. ft. per second additional water for the Town of Farmington for irrigation purposes. ALSO including 10.0 cu. ft. per sec. for Town of Farmington Municipal Reservoir.

Total of Irrigated Acres: 1787.62.

Additional Rights: In addition to the waters diverted for irrigation of lands, this ditch and the land owners and water users thereunder have the subsisting vested right to demand, divert, receive and use such amount and amounts of waters, as are from time to time beneficially needed and required, for domestic and stock watering purposes.

Exhibits: Photostatic copy of plat filed as exhibit No. 48. Photostatic copy of Application for Permit filed as exhibit No. 50. Photostatic copy of Agreement filed as exhibit No. 51.

Remarks: Independent and Halford Community Ditches show constructed same year of 1891.

STATE OF NEW MEXICO, IN THE DISTRICT COURT, COUNTY OF SAN JUAN, CAUSE No. 01690, INDEPENDENT DITCH CO., ET AL, VS. McDERMOTT DITCH CO., ET AL

Land Description:
Lands within the corporate limits of the Town of Farmington as shown by plat thereof on file in
the office of the County Clerk and Recorder of San Juan County, New Mexico.
Remarks:
Water allotted in acre feet to the Town of Farmington is doubled to compensate for excessive loss
by seepage and evaporation when diverted into numerous small laterals for irrigation of small
lots and tracts of land.

Land Owner: Town of Farmington.  Water Alotted: 5.0 Sec. Feet.
Land Description:
This five cu. ft. of water is for storage in Reservoir owned by the Town of Farmington and situate
in W\(\frac{1}{2}\)SW\(\frac{1}{4}\) Sec. 8, Twp. 29 N., R. 13 W., N. M. P. M. and is stored for domestic and municipal use.
STATE OF NEW MEXICO

OFFICE OF STATE ENGINEER

LICENSE TO APPROPRIATE

License No. 2995 

Refers to Permit No. 2995

WHEREAS, on the 23rd day of December, 1960 after
notice pursuant to statute the State Engineer did approve
Application No. 2995 to appropriate from storage 7200 acre
feet of surface water per annum for municipal purposes said
water supply being diverted from the Animas River, of the
San Juan Stream System and delivered into storage through
the Farmer's Ditch, and

WHEREAS, Proof of Completion of Works, Proof of Applica-
tion of Water to Beneficial Use and Engineer's Report on
final inspection have been duly filed with the Office of
the State Engineer.

NOW THEREFORE, I, S. E. Reynolds, State Engineer of
the State of New Mexico, by virtue of the authority vested
in me by the laws of said State, do hereby grant to the
City of Farmington, County of San Juan, State of New Mexico,
this License No. 2995, with a priority dating from the
filing of Notice of Intention No. 2995, being the 20th
day of August, 1959 to appropriate from storage 7200 acre
feet of surface water per annum for municipal purposes,
said water supply being diverted from the Animas River, of
the San Juan Stream System and delivered into storage through
the Farmer's Ditch which ditch heading is located on the
Animas River, at a point in the SW NW 4 Section 26, Township
31 North, Range 11 West, N.M.P.M., whence the West one-
quarter corner of said Section 26, bears South 82° 47' West,
935 feet distant, outlet works of the storage dam being located at a point in the SE^4 NW^4 Section 21, Township 30 North, Range 12 West, N.M.P.M., whence the Southwest corner of said Section 21, bears South 61° 44' West, 3014.1 feet distant, the capacity of the reservoir being 5286 acre feet to level filled by gravity flow from Farmer's Ditch and 6855 acre feet to spillway crest; this license is to be used as above stated and can be changed only as provided by law, and further provided that the license be not exercised to the detriment of any other person having prior existing rights to the use of the waters of the Animas and San Juan Stream System.

IN WITNESS WHEREOF, I have hereunto set my hand and official seal this 24th day of July, 1968.

S. E. Reynolds
State Engineer

STATE OF NEW MEXICO  
OFFICE OF STATE ENGINEER  

CERTIFICATE OF CONSTRUCTION  

Certificate No. 2995  
Refers to Permit No. 2995  

THIS is to certify that the works known as the City of Farmington's Storage Reservoir #1 (Lake Farmington), constructed under authority of Permit No. 2995, receiving a water supply from the Animas River of the San Juan Stream System delivered through the Farmer's Ditch which heading is on the Animas River at a point in the SW1/4 Section 26, Township 31 North, Range 11 West, N.M.P.M., whence the West quarter corner of said Section 26, bears South 82° 47' West, 935 feet distant, and the outlet works of the storage dam being located at a point in the SW1/4 Section 21, Township 30 North, Range 12 West, N.M.P.M., whence the Southwest corner of said Section 21, bears South 61° 44' West, 3014.1 feet distant, after having been inspected and reported on by Robert L. Maddox, Jr., registered professional engineer and land surveyor in the State of New Mexico, were found to be constructed and adequate for the intended purposes, the constructed works being described as follows:

Inlet Works

The reservoir receives its water supply delivered through the Farmer's Ditch; canal is 20,000 feet in length and concrete lined; bottom width, 4.0 feet; side slopes, 1:4 to 1; working depth, 2.6 feet; slope, 0.4 feet per 1000 feet; cross-sectional area, 18.83 square feet; velocity, 2.8 feet per second; capacity, 53.0 cubic feet per second;

Storage Dam

The storage dam is a gravity type structure constructed of earth with an impervious corewall of clay; maximum height of dam above stream bed, 117 feet; depth below stream bed, 40 feet; upstream
slope, 2-3/4 to 1 with 6" to 1' rock riprapping; downstream slope, 2:4 to 1 with select surfaced material riprapping; free board above maximum high water line, 7.0 feet; crest length, 1075 feet; crest width, 25 feet; crest elevation, 5645 feet; drainage area above dam, 3.1 square miles; area of reservoir at high water line, 205 acres; area of reservoir at the spillway crest, 198 acres; area of reservoir at capacity filled by gravity flow from Farmer's Ditch, 175 acres; capacity of reservoir at spillway crest, 6855 acre feet; capacity of reservoir as filled by gravity flow from Farmer's Ditch, 5286 acre feet; dam contains about 1,015,500 cubic yards of material;  

**Spillway**

The spillway is located at the southwest side of the dam; is 975 feet long, lined with concrete and riprap; has a bottom width of 10 feet; cross-sectional area at maximum high water, 176 square feet has flow line elevation of 5637; and a maximum discharge capacity of 800 cubic feet per second;  

**Outlet Works**

The outlet works consist of a reinforced concrete outlet tower, 4.0' I.D., access via boat; four 24" outlet butterfly valves operated from a deck elevation of 5642 feet - Valve # 1 C.L. elevation 5630, Valve # 2 C.L. elevation 5620, Valve # 3 C.L. elevation 5610. Valve # 4 C.L. elevation 5690 - valve inlet has a standard well screen; outlet conduit passes through the dam on the east side, is made of 36" x 1/2" wall steel pipe 610 feet in length with a 36" butterfly valve at the end; discharge capacity at full reservoir is 30 cubic feet per second;  

**Pipeline**

A pipeline made of concrete cylinder pipe 36" and 30" in diameter extends from the dam to the City's water treatment plant; length of 36" pipe is 20,690 feet, cross-sectional area is 7.1 square feet, slope is 2.0 feet per 1000 feet minimum; length of 30" pipe is 19,819 feet, cross-sectional area is 4.9 square feet, slope is 5.5 feet per 1000 feet minimum; combined discharge capacity is 30 cubic feet per second.

WITNESS my hand and official seal this 25th day of July, 1968.

Proof of Application of Water to Beneficial Use

SURFACE WATERS

Name of permittee: City of Farmington

Post Office address: P.O. Box 900, Farmington, County of: San Juan

State of: New Mexico

If acting for permittee, give your name and title.

This permit, numbered: 2995, was formally approved by the State Engineer on December 1, 1963, to appropriate 7200 acre feet of water from Animas River, a tributary of San Juan River for Municipal purposes.

The point of diversion from the stream, or the outlet from the channel reservoir, is situated at a point in the SW quarter of the NW quarter of Section 26, Township 31 North, Range 11 West, N.M.P.M., whence the NW corner of section 26, Township 31 North, Range 11 West, bears $82° 47' West 935 feet distant.

Farmer's Ditch has a working capacity of 53 cubic feet per second. (If more than one, give name or location and capacity of each)

Storage capacity of reservoir is: 6855 acre feet.

Irrigation and Domestic Uses

The quantity of water required to be delivered on the land during the __________ (year, irrigation season)

from __________ to __________ for irrigation and domestic purposes is __________ (ac. ft. per ac. or sec. ft.)

and for the remainder of the year is __________ for __________ purposes.

During __________ approximately __________ acre feet per acre was applied to beneficial uses on __________ acres of land described as follows:

Proof of Completion of Works

SURFACE WATERS

State of New Mexico
County of San Juan

Permit No. 2995

I, Floyd G. Davis, Mayor
of Town of Farmington, County of San Juan
State of New Mexico, being first duly sworn, do hereby certify that I am the owner and holder of a permit to appropriate water from the Animas River (river, spring, arroyo, seepage, etc.) a tributary of the San Juan River (river, stream system, closed basin, etc.) in the County of San Juan for municipal purposes; that the formal application for said permit together with necessary maps, plans and specifications was received and filed in the office of the State Engineer of New Mexico under No. 2995; that said application, maps, plans, and specifications were approved by the State Engineer on the 23rd day of December 1960; that the works necessary to accomplish the appropriation of water in accordance with the terms of said permit have been completed; that the following statement of facts is submitted in proof of the completion of said works; and that said statement and each and all of the items contained therein are true to the best of my knowledge and belief.

Mayor of Farmington, New Mexico

My commission expires the 30th day of December 1964

Notary Public

STATEMENT

1. Name of appropriator: Town of Farmington
2. Postoffice address: Town of Farmington, P. O. Box 900
3. The direct source of supply is the Animas River using the Farmer's Ditch (reservoir, river, lake, drainage, etc.) in the San Juan River basin or stream system.
4. The point of diversion (or outlet from channel storage) is situated at a point in the southwest quarter of the northwest quarter of section 26, Township 31 north, Range 11 west, N. M. P. M., whence the west corner of section 26, Township 31 north, Range 11 west, bears S 82° 47' W 233 feet distant.
5. The constructed works consist of the Farmer's Ditch improvement (concrete liner - 20,000 feet) to the reservoir, the earth-fill dam and the pipeline to the Town workwaters from the dam.

6. DIVERSION CANAL FROM STREAM OR FROM CHANNEL RESERVOIR (direct diversion project, diversion to off-channel reservoir, or diversion from a channel reservoir). Farmer's Ditch

The main canal or conducting channel is constructed of concrete (earth, concrete, pipe, etc.) and has the following properties: total length 20,000 feet; bottom width 4 feet; side slopes of 1:5; effective or working depth 2.8 feet; fall of 0.4 feet per 1,000 feet; area of cross-section 10.85 square feet; and will discharge at maximum effective depth 53 second-feet of water. If a pipe line, circular flume, etc., give inside diameter or other pertinent dimensions, length, effective slope, etc., cross-sectional area and capacity in second feet.
DIVERSION DAM

None this project (Farmer's Ditch)

The diversion dam is constructed of:
- (brush, rock, concrete, masonry, etc.)
- crest length, feet;
- crest width, feet;
- height above stream bed, feet;
- depth below stream bed, feet;
- side slopes of
- on upstream face;
- on downstream face;
- contains about cubic yards of material.

STORAGE DAM

The storage dam is of:
- gravity type constructed of earth
- with core wall or impervious fill of clay
- maximum height of dam above stream bed, feet;
- height below stream bed, feet;
- upstream slope 7:1; downstream slope 3:1, with
- riprap; drainage area above maximum high water line, feet;
- crest length, feet;
- crest width, feet;
- crest elevation (sea level or assumed datum), feet;
- drainage area above dam, acres;
- capacity of reservoir, cubic yards of water;
- cost of dam and outlet works, dollars.

The spillway is located at the side of dam.

The outlet works consist of (describe fully, giving size, type and location of gates with respect to dam and reservoir, length, material, shape, cross-sectional area and location of outlet conduit with respect to dam, its flow-line elevation and discharge at full reservoir level):
- A reinforced concrete outlet tower, 3' 8" I.D., with access via boat. These are four (4) 4' 4" outlet butterfly valves rated from a deck elevation of 5,642 ft. - valve #1 C.L. elevation 5,630 ft., valve #2 C.L. elevation 5,620 ft., valve #3 C.L. elevation 5,610 ft., valve #4 C.L. elevation 5,590 ft. Installed standard cast-iron gate valve. The outlet conduit is made of 36" 4' wall steel pipe 610 ft. long at 36" Butterfly valve at the end. The outlet conduit passes through a dam on the east side. Discharge at full reservoir is 30 cfs.

AIN CANAL BELOW OFF-CHANNEL RESERVOIR AND/OR OTHER MAIN CANALS (describe each according to outline given under No. 6 of Statement):
- A pipeline made of concrete cylinder pipe 30" in size, 20,690 ft. of 36" pipe and 19,819 ft. of 30" pipe extends from a dam to the Town water treatment plant. Area of the 30" pipeline = 4.9 sq. ft. for the 36" pipeline the area = 7.1 sq. ft. The effective slope of the 30" is 3055 minimum and for the 36" it is 0.0020 minimum. Discharge capacity is 30 cfs.

Does permittee hold all necessary rights-of-way for above works without controversy? Yes

Construction of works was completed January 20, 1964

Additional Remarks: None

ENGINEER'S CERTIFICATE

Robert L. Maddox, Jr. of Santa Fe
Robert L. Maddox, Jr. of Farmington

of New Mexico

of New Mexico, having been duly sworn, do solemnly swear that I am a qualified registered professional engineer and/or land surveyor, and that I have inspected the works as above set forth and find them to be completed in accordance with the foregoing statement of facts, that the work is properly and safely constructed and are now in a satisfactory condition for acceptance.

Signed

Licenses No.

Commission expires October 5, 1967

Notary Public.
APPLICATION FOR PERMIT

To Appropriately the Public Surface Waters of the State of New Mexico

Book No. M-3

1. Date of receipt of formal application: August 26, 1960

2. Name of applicant: Town of Farmington

   Post Office address: Farmington, County of San Juan
   State of: New Mexico

3. If applicant is a corporation give: (a) Date and place of organization:
   (b) Amount of capital stock, $:
   (c) Amount paid in, $:
   (d) Names and addresses of directors:

4. Quantity of unappropriated water applied for: 7200 acre feet
   (a) By direct diversion: 50 second watercourse; (b) by storage: 7200 acre feet;
   (c) It is proposed to provide sufficient storage for an estimated 120 days of raw water supply from this source alone.

5. Period of annual use: January 1 to December 31

6. Source of water supply: (a) Name of stream or watercourse: Animas River via Farmer Ditch,
   as extended, and the runoff from the drainage area above the reservoir.
   (b) Which is a tributary of: Colorado
   (c) or is situated in Section, Township, Range:

7. Location of point of diversion or outlet from channel, reservoir storage: SE 1/4 quarter of the NW 1/4 quarter of Section 21, Township 30N
   Range 12W, N.M.P.M., at a point whence the SW corner of Section 21, Township 30N, Range 12W
   bears 86° 44' W, 3014.10 feet distant.

8. To be used for: Municipal Water Supply purposes.

9. If used for IRRIGATION AND DOMESTIC PURPOSES fill in the following:
   (a) Application is hereby made for: acre feet of water per acre for irrigation purposes; (b) if application is made for water during the non-irrigation season,
   state the need for the same:

   (c) number acres to be irrigated, acres, described as follows:

<table>
<thead>
<tr>
<th>Subdivision</th>
<th>Sec.</th>
<th>Twp.</th>
<th>Rge.</th>
<th>Acres</th>
<th>Owner</th>

* The Heading of the Farmer's Ditch at the Animas River is N28° 47' E 935 feet from the West 1/6 corner of Section 26 T31N R16W.
10. If used for manufacturing, no power or like purposes fill in following:
(a) Application is hereby made for ____________________________ square feet of water to be used for ____________________________ purposes;
(b) power to be generated ________________________________ horsepower; (c) conducted by ____________________________

(give size and description of conduit)

feet in length; (d) from a point in the ____________________________ quarter of Township ____________________________

Range ____________________________ N. F. M. (e) to a point where the water will be returned to the stream substantially unchanged in quantity in the ____________________________ quarter of Township ____________________________

Range ____________________________ whence the ____________________________ of Section ____________________________

Township ____________________________ Range ____________________________ bears ____________________________ feet distant; (f) the amount of water which will be consummately used in the above operation is ____________________________

11. Describe diversion dam, stating construction materials, character of foundation, dimensions, etc.

12. Hydraulic properties of main canal or conduit

**Farmer's Ditch Extension**

(name or number)

Bottom width 8 feet; depth of water at full operating capacity 2.5 feet; total depth including freeboard 2.4 feet; side slopes 1:1 horizontal to 1 vertical; diameter (pipe line or circular flume) 1.7 feet; slope 0.4 feet per 100 feet; hydraulic radius 1.78 feet; coefficient of roughness (n) 0.025; velocity at full capacity 1.77 feet per second; capacity 50 cubic feet per second; length of canal extension 6600 feet.

The location being as shown on the filing maps accompanying this application.

12a. Hydraulic properties of main canal or conduit

(name or number)

Bottom width ____________ feet; depth of water at full operating capacity ____________ feet; total depth including freeboard ____________ feet; side slopes ____________ horizontal to 1 vertical; diameter (pipe line or circular flume) ____________ feet; slope ____________ feet per 100 feet; hydraulic radius ____________ feet; coefficient of roughness (n) ____________; velocity at full capacity ____________ feet per second; capacity ____________ cubic feet per second; length of canal ____________ feet, the location being as shown on the filing maps accompanying this application.

18. Hydraulic properties of storage dam: Maximum height above foundation ____________ feet; length of crest ____________ feet; maximum width at base ____________ feet; crest width ____________ feet; slope of upstream face ____________ 2:3:4:1; elevation at crest of dam ____________ feet; elevation of spillway crest ____________ feet; elevation of flow line of outlet conduit ____________ feet; freeboard (above high water line at maximum spill) ____________ feet; width of spillway ____________ feet; discharge capacity of spillway ____________ cubic feet per second; size and character of outlet conduit 36" dia., 0.50-inch wall, coated and wrapped steel pipe.

Discharge capacity of outlet under full head ____________ cubic feet per second; type of dam, construction material, etc. earth filled dam with impermeable core.

N. W. S.
Farmington presently receives its raw water supply from the Animas River; either by pumping from the Animas River or Willett Ditch, through the same pumping station; or from the Haldorf-Independent Ditch (with pumping near Aztec) which supplies the present Town Reservoir located near North Butler Ave. and 23rd Street in Farmington.

The capacity of the reservoir is estimated to be approximately 80 AF at the present time, which at peak demand provides only about three days supply. Periods of high demand on the municipal system coincide with periods of low flow in the Animas River. If there should be a period of no flow in the river the Town would be in a very serious position regarding water in less than a week.

It is proposed to build a dam which will impound 5703 acre feet of water at Normal Water Surface Elevation. The runoff from the drainage area above the reservoir will be impounded and the balance of the requirements will be supplied from the Animas River through the Farmers Ditch and extension thereof. The Farmers Ditch will supply water by gravity to a reservoir level of 3509. Above this elevation the reservoir will be filled by pumping.

When the reservoir is at full capacity it will provide an estimated 120 days raw water supply from this source alone, at maximum design rate.

The reservoir will be filled from the Animas River through the Farmers Ditch. Necessary measures are to be taken to adopt the ditch to the capacity required for the applied for diversion rate.

Subscribed and sworn to before me this 14th day of October, 1961
(Notary Public)

My commission expires October 5, 1961

Approval of State Engineer

Number of this permit: 2995
Date received corrected

Recorded in Book M-3 Page 2995
Publication of Notice ordered: Sept. 14, 1960
Name of Paper: Farmington Daily Times

Notice of Intention received Aug. 20, 1960
Application received Aug. 26, 1960
Notice of Publication filed Nov. 8, 1960

Date returned for correction: Date of approval December 23, 1960

This application is approved for the appropriation of 7,200 acre feet of water per annum as measured at the outlet from the storage reservoir, provided that:

1. The rate of diversion shall not at any time exceed 50 cubic feet per second.

2. The Town of Farmington shall install, operate and maintain devices approved by the State Engineer for the measurement and recording of 1) water in storage, and 2) diversion from storage. Records of water in storage and diversions shall be submitted to the State Engineer in a form prescribed by him, not later than the 10th day following each month of record.

3. This permit shall not be exercised to the detriment of anyone having prior valid and existing rights to the use of water from the San Juan and Animas stream system.

This is to certify that I have examined the above application for permit to appropriate the public surface waters of the State of New Mexico and hereby approve the same subject to the foregoing provisions and conditions.

Witness my hand and seal this 23rd day of December, 1960

S. E. Reynolds
State Engineer

By: Frank E. Irby
Chief
Water Rights Division

OSE-2422
NOTICE OF INTENTION TO MAKE FORMAL APPLICATION FOR PERMIT

To Appropriately the Natural Public Surface Waters of the State of New Mexico

1. Date of receipt of Notice of Intention: August 20, 1959
   (a) Formal application to be received on or before: August 20, 1962

2. Name of applicant: Town of Farmington
   Post Office: Farmington
   County of: San Juan
   State of: New Mexico

3. If applicant is a corporation give:
   (a) Name and place of organization of corporation
   (b) Amount of capital stock
   (c) Amount paid in
   (d) Names and addresses of directors

4. Quantity of unappropriated water claimed (see note on back): 14,475,50
   (a) By direct diversion: 50
   (b) By storage: 15,000

5. Source of water supply (a) Name of stream or watercourse: Animas River
   (b) Which is a tributary of: San Juan River

6. Location of point of diversion or outlet from storage (if more than one, locate each):
   The diversion point is to be any approved municipal diversion engineer point
   of section, Township, Range
   (1) SE
   (2) SW
   (3) SE
   Outlet from storage may be any one or all of the above locations

7. To be used for: Municipal purposes

8. IRRIGATION AND DOMESTIC USE
   (a) Number of acres to be irrigated
   (b) Described as follows:

9. MANUFACTURING, MINING, POWER AND LIKE PURPOSES
   (a) Quantity of water
   (b) Power to be generated

OSE-2423
8. Further description of proposed project of old works to be amended or enlarged hereby:

9. References:

   I. George W. Sprague

   do solemnly swear that I have read the foregoing statements and that the same are true to the best of my knowledge and belief.

   Claimant: Town of Farmington

   George W. Sprague

   Subscribed and sworn to before me this 30th day of August A.D. 19__.

   My commission expires ______.

   Notary Public

   Commission expires October 5, 19__.

   Additional statements or explanations: Due to Farmington's growing demand for a reliable raw water supply it becomes advisable to develop storage facilities to carry them over periods of low river flow and other interruptions to their raw water supply. The storage program will be built in stages as dictated by system demands. Also, additional water is required to initially fill the storage and to maintain an adequate municipal supply.

INSTRUCTIONS AND EXPLANATIONS FOR FILLING THIS FORM

(See Manual of Revised Rules and Regulations, Section on General Principles of Appropriation and Article on Notice of Intention.)

This form shall be made out in duplicate and shall be accompanied by a filing fee of $10.00. If the application is to enlarge an existing project or to amend a permit, fill out this form to cover only the enlarged or amended portion, then state under Section 5 the data necessary to define the old works.

Section 1. This section to be filled out by the State Engineer.

Section 2. Fill in the name and address of the applicant.

Section 3. If the applicant is a corporation, company or firm, fill out blanks under section three. Give date of filing certificate of incorporation with the Corporation Commission.

Section 4. The quantity of water to be appropriated for irrigation purposes should be stated in acre-feet delivered on the land. The amount to be used wholly or in part by direct diversion shall be noted after (a); that to be used wholly or in part by storage, after (b). Under (c) give any additional information necessary to properly state or define the use.

Important: Except in the case of flood water projects, no direct diversion to the irrigated lands may be made at a rate greater than 1 second foot for each 70 acres. In no case may a right be acquired for more water than can be beneficially used upon the irrigated area.

Section 5. Each blank under this section shall be filled out.

Section 6. In a direct diversion project, or in the case of diversion to an off-channel reservoir, the point of diversion is the location of the canal headgates on the bank of the stream or water-course. If water is to be stored behind a dam across the stream itself, the point of diversion then becomes the location of the outlet gates from the reservoir.

If the point of diversion lies on unsurveyed lands, it should be described as nearly as possible by legal subdivision "as projected" from the nearest accepted government survey.

Section 7. State all the purposes for which the water is to be used. If for "Irrigation and Domestic Use" state under (a) the total number of acres to be irrigated; under (b) the location of lands to be irrigated. If for "Manufacturing, Mining, Power, or Like Purpose", fill out the statements under that heading. If water is to be used for several purposes, fill out all blanks referring to the different purposes.

Section 8. Give here any additional data necessary to describe the proposed works or old works to be amended or enlarged hereby.

Section 9. Give references of a bank and merchant with whom applicant does business or to whom he is known.

Claimant shall sign affidavit to above statements before a Notary Public or other proper official qualified to administer oaths.

Note: If additional space is necessary, use a separate sheet of paper and attach securely hereafter.
