FLOW METER LIST

(Revised Summer 2020)

The New Mexico Office of the State Engineer (“State Engineer”) has reviewed the meters on the following list and determined that each meets the groundwater measurement specifications for metering as established by the State Engineer. The State Engineer does not intend for this list of approved water meters to be exhaustive and does not endorse any of the listed meter models or manufacturers. However, Proper installation of one of the listed meters will satisfy the State Engineer’s meter requirements. **Please be advised that there may be other meters that meet the specifications required by the State Engineer. Before purchasing a meter that is not listed below, please verify with the appropriate District Office that the meter is in compliance with the State Engineer’s requirements.**
