October 12, 2000

Mr. Frank White
Development Review Specialist
Santa Fe County
P.O. Box 76
Santa Fe, NM 87504-0276

Reference: Turquoise Trail Fire Department

Dear Mr. White:

The Office of the State Engineer has reviewed the preliminary plat proposal for the reference development. It is my opinion that sufficient water will be available to meet the requirements of the development.

A staff memorandum in support of this opinion is attached for your review. A copy of this opinion and attached memorandum should be provided to the developer.

An opinion issued by the State Engineer that the developer can fulfill his water proposals does not imply a guarantee that water in sufficient quantities to meet the needs of the developer will be obtained for any period of time.

If the language of this letter is summarized or otherwise modified by the developer, approval must be obtained from the Office of the State Engineer. If you should have any questions regarding this review, please feel free to call Mr. Patrick Romero at (505) 827-6790.

Sincerely,

Brian Wilson, P.E., Bureau Chief
Water Use and Conservation
